his book tells not only how victory was gained through a combination of technology tactics and army navy cooperation but also how the new guinea campaign exemplified the strategic differences that plagued the pacific war since many high ranking officers considered it a diversionary tactic rather than a key offensive

when it comes to the origins of today's sharp partisan divide most have pointed to the usual suspects newt gingrich's republican revolution in 1994 watergate and the vietnam war in the forgotten debate dane j cash suggests that we need to look further back in history he argues that we can trace the roots of the current

ideological divide in america to the period of the korean war the 1950s were hardly a time of liberal consensus as cash maintains that liberals themselves were quite divided about the proper course of action in korea and in the cold war more generally left liberals supported containment policy and its manifestation as a limited war in korea whereas hawkish liberals favored a much more aggressive strategy particularly one vis à vis communist china which was largely indistinguishable from the position taken by avowed conservatives the seeds of neoconservatism were thus sown much earlier than is typically appreciated furthermore conservative voices were galvanized by what they perceived to be american timidity and ultimately failure in prosecuting the korean war their frustrations about korea and american weakness toward china led them to develop a unilateralist america first foreign policy which coalesced into a coherent movement several years prior to the founding of william f buckley jr s national review in 1954 generally considered to be the genesis of modern conservatism drawing on a range of opinion journals the forgotten debate shows that conflict rather than consensus marked elite attitudes to the korean war cash thus reminds us that the divisions in society today have a much longer history than we typically realize the korean war is often ignored and overshadowed by later developments like the civil rights movement and the vietnam war but many of our current ideological positions were forged in that forgotten period

distinguished historian d clayton james offers a brilliant reinterpretation of the korean war conflict focusing on the critical issue of command he shows how the korean war is a key to understanding american decision making in all military encounters since world war ii korea the first of america s limited wars to stem the tide of world communism was fought on unfamiliar terrain and against peasant soldiers and would become a template for

subsequent american military engagements especially vietnam and yet the strategic and tactical doctrines employed in korea as well as the weapons and equipment were largely left over from world war ii james the master biographer of macarthur uses studies of military crises to examine the american high command in the korean war he explores the roles leadership personalities and prejudices of five key commanders president harry s truman generals douglas macarthur matthew b ridgway and mark w clark and admiral c turner joy and then looks at six crucial issues confronting them in that conflict from the decision made by truman without congressional approval to commit united states forces to combat in korea to macarthur s persistent fight for approval of his dangerous plan to assault inchon to the judgment to finally open truce negotiations these turning points illuminate the american way of command in wartime james analyzes the ground level results and long term implications of each choice and sensitively explores the course that might had followed if other options had been taken probing the nature and consequences of these military resolutions james shows how the conduct of the korean war like every new war bears the imprint of the preceding one
